

Participant Consent Form: Mid-Air Gesture Interaction in Cars

The aim of this experiment is to learn about what gestures people will associate with different actions in a car with a sensor present next to them.

This survey should take roughly 30 minutes to complete.

Firstly, the format of the survey will be explained, and the participant will be asked to position their camera so that their hand is visible. The participants will be made aware that all their actions will be recorded and that they can drop out at any point.

All results will be kept private. No personal information will be stored about the participant and if they choose to drop out, then all data will be discarded.

If you have any further questions about the survey, please contact:

Catriona Murphy
