

Debriefing Scripts

The main aim of the survey was to learn about what gestures people associate with different actions in a car. However, I was also looking to see if you repeated any gestures for more than one action. This would imply that some actions may not be able to be done using mid-air gesture interaction if it's too similar to another action.

Do you have any comments or questions about the survey? If you have any further questions, then you have my contact details. Thank you for your help.
