

Debrief Script – Experiment

Mid-Air Gesture Interaction in Cars

The main aim of this survey was to find out if the gestures were able to be done in the backseat of the car. However, I was also looking to see if the feedback given was appropriate. If it wasn't then I would have to look into other ways to give feedback.

Do you have any comments or questions about the survey?

If you do have any further questions then you have my contact details. Thank you for your help.
